AMENDMENTS TO THE SPECIFICATION:

Page 1, before line 9, insert the following heading:
--BACKGROUND OF THE INVENTION--

Page 2, between lines 28 and 30, insert the following heading:

--SUMMARY OF THE INVENTION--

Page 3, between lines 29 and 31, insert the following heading:

--BRIEF DESCRIPTION OF THE DRAWINGS---

Page 4, between lines 11 and 13, insert the following heading:

-- DESCRIPTION OF THE PREFERRED EMBODIMENTS--

Page 4, replace the paragraph beginning on line 25 with the following amended paragraph:

--Moving on to Figure 2, the elements 1 and 2 are joined to each other by means of pins 8, whose ends are attached to the elements 1 and 2 by means of plates 9 which are embedded in either one of the elements forming the stock attached by one end to plates 9 embedded in either of elements 1 or 2 of the stock, and attached by the other end by means of screws 11 to the plates embedded in either element 2 or 1 as described above. Said plates can regulate mircrometrically the position of the ends of the pins 8 in a transverse direction to the stock, as said ends are attached to a worm screw a respective one of worm screws 10.--

Page 5, replace the paragraph beginning on line 1 with the following amended paragraph:

-- In a preferred embodiment, regulation of the horizontal movement of element 1 in relation to element 2 therefore takes place with micrometric regulation of the position of the pins 8 by actuating the worm screws 10 which move the point of attachment of the pin in a transverse direction, enabling translation (moving both pins 8 in the same direction) or rotation (modifying the position of the pins 8 in opposite directions or adjusting only one thereof) of one element in relation to the other.--
